

Diabetes Training for School Staff

This diabetes training is designed for nurses, school health care providers, and school staff involved in the care of students with diabetes.

Presented by staff from the Diabetes Program at Children's Wisconsin.

This class covers the basics of blood sugars, carbohydrates, and caring for the child at school.

This class is offered virtually, via Zoom. A live Question and Answer period will also be offered via Zoom. Registrants will spend about 2 hours viewing the online class prior to the Question and Answer period. Handouts and a link to the recorded portion of the class will be emailed to registrants.
