Previous editions: 1999, 1993, and 1990 written by Diane O'Donnell, RN, MS; and Julie Lathrop, RN, MS. Illustrations by Patricia Kornis.

# Contents

## Section 1—Overview

Why study fluids and electrolytes? .....	1
What are the goals? .....	2
How to use this self study .....	3
What are electrolytes?.....	5
What is fluid balance? .....	5
Where are fluids found in the body? .....	5

## Section 2—Fluid and electrolyte basics

What forces affect the movement of fluids? .....	6
Oncotic forces.....	6
Hydrostatic forces .....	7
Osmotic forces .....	8
Sensible and insensible losses.....	10
Differences between infants, children, and adults ....	12
Internal distribution of water .....	12
Insensible water losses .....	14
Kidney function .....	15
Check your knowledge.....	17
Answers .....	18

### **Section 3—Assessing fluid and electrolyte disturbances**

Physical assessment.....	20
Skin assessment.....	20
Mucous membrane assessment.....	21
Head assessment.....	22
Vital sign assessment.....	23
Behavioral/Neurologic assessment.....	25
Intake and output.....	25
Check your knowledge.....	26
Answers.....	28

### **Section 4—Maintenance fluids and electrolytes**

Daily maintenance fluid needs.....	30
Application: Calculating daily maintenance fluid needs.....	31
Application answers.....	32
The 4:2:1 rule.....	32
Application answers.....	34
Daily sodium, potassium, and chloride needs.....	34
Daily glucose needs.....	35
What is dehydration?.....	37

### **Section 5—Assessing dehydration**

How does the body normally compensate for dehydration?.....	38
How does the body maintain osmolality?.....	38

How does the body maintain volume status? .....	38
Percentage of weight loss and degree of dehydration... ..	39
Calculating the percentage of weight loss .....	39
Estimating the fluid deficit based on signs and symptoms of dehydration .....	40
Application: Percentage of weight loss and degree of dehydration .....	41
Application answers .....	42
Calculating the fluid deficit .....	42
Application: Fluid deficit .....	43
Application answers .....	45
Parenteral fluid rehydration therapy .....	47

## **Section 6—Managing dehydration**

Phase I—Restore intravascular volume quickly.....	48
Phase II—Rapid volume repletion .....	50
Phase III—Replace remaining deficit .....	52
Sodium and potassium deficits.....	52
Phase IV—Provide maintenance fluids .....	53
Phase V—Replace ongoing losses .....	54
Adjusting fluid therapy .....	54
Phase VI—Patient reassessment (continual).....	55
Follow up .....	57
Application: Dehydration.....	58
Check your knowledge.....	61
Answers .....	62

## Section 7—Types of dehydration

How these disturbances take place .....	64
Isonatremic dehydration .....	65
Check your knowledge .....	65
Answers .....	66
Hypnatremic dehydration .....	66
Causes .....	66
Clinical signs and symptoms .....	67
Management .....	67
Check your knowledge .....	69
Answers .....	70
Application: hypernatremia .....	71
Hyponatremic dehydration .....	73
Causes .....	73
Clinical signs and symptoms .....	73
Management .....	74
Check your knowledge .....	75
Answers .....	76
Application: hyponatremia .....	77
Assessing laboratory data .....	79

## **Section 8—Assessing and interpreting serum test results**

Sodium ( $\text{Na}^+$ ) test .....	80
Potassium ( $\text{K}^+$ ) test .....	81
Chloride ( $\text{Cl}^-$ ) test .....	83
Calcium ( $\text{Ca}^{++}$ ) test .....	84
Hemoglobin (Hgb.) and hematocrit (Hct.) test .....	86
Blood urea nitrogen (BUN) test .....	87
Creatinine test .....	87
Protein test .....	88
Serum osmolality test .....	89
Assessing laboratory data .....	91

## **Section 9—Assessing and interpreting urine test results**

Specific gravity test .....	92
Osmolality test .....	92
pH test .....	93
Ketones test .....	93
Potassium ( $\text{K}^+$ ) .....	94
Sodium ( $\text{Na}^+$ ) .....	94

## Section 10—Hyponatremia

Signs and symptoms .....	100
Hypovolemic hyponatremia .....	101
Gastroenteritis and hyponatremic dehydration ...	101
Third spacing .....	102
Euvolemic hyponatremia .....	109
SIADH.....	109
Water intoxication.....	110
Hypervolemic hyponatremia .....	112
Causes .....	112
Clinical signs and symptoms .....	112
Management.....	112
